# ACCESSORIES

## + PLOUGHING DISC

To avoid any trace of the last disc after the roller passage and to get most perfect surface.

## + DEFLECTOR DISC

Fixed inside the first disc to avoid excessive earth projection outside the tool working width.

## + LATERAL DEFLECTOR

All directions adjustable, it prevents earth projection of the front array from getting out of the rear array working width.

## + BALANCE HYDRAULIC ADJUSTMENT

Useful for continuous adjustment while working on very rough ground.

# ARRAYS ANGLE ADJUSTMENT

## + MANUAL ADJUSTMENT

And manual lock safely reachable from the outside of the tool. An even more efficient locking system can be used as a option.

## + HYDRAULIC ADJUSTMENT (OPTIONAL)

A cylinder allows synchronized adjustment of the 2 discs arrays' opening angle.

The array adjustment arm allows you to change the rear array's opening angle dependind on the front array's angle.

A ruler indicates the angle of the 2 arrays.
